Kostiantyn Agapov

San Diego, CA 92111 | +1 929 294 5554 | konstagapov123@gmail.com

Professional summary

Systems-oriented Software Engineer with proven expertise developing high-traffic Spring Boot microservices and customer-facing React applications for millions of TurboTax users. Skilled in performance engineering, observability, and architectural migrations. Adept at cross-platform delivery, automated testing, and leveraging AI-assisted workflows to accelerate delivery and enhance code quality across web and mobile ecosystems.

Work authorization

Authorized to work in the US for any employer

Work experience

Software Engineer

Intuit | San Diego, CA

November 2023 to Present

- Developed and maintained high-traffic Spring Boot microservices powering TurboTax, leveraging Java 21 and Kotlin Coroutines to ensure resilient, non-blocking performance for millions of users.
- Engineered a high-performance algorithm to calculate tax return completion status, enabling real-time progress tracking and actionable data-driven insights for millions of TurboTax users.
- Delivered mission-critical API endpoints supporting the 'Calculation on Completion' feature, directly improving the accuracy and speed of the tax filing experience for end users.
- Authored and executed complex Gatling load-testing scripts to simulate peak-season traffic, identifying bottlenecks and ensuring system stability under heavy load conditions.
- Established comprehensive Splunk observability dashboards and proactive alerting systems, significantly reducing Mean Time to Detection by identifying anomalies before customer impact.
- Developed customer-facing components for TurboTax Online, creating intuitive screens that guided users through unreviewed or incomplete tax topics in federal and final review.

Software Engineer

Intuit | San Diego, CA

October 2022 to November 2023

- Led the migration of a large-scale codebase to a modern technology stack, ensuring seamless integration through cross-functional collaboration and robust version control practices.
- Developed reusable, type-safe React components in TypeScript and managed complex application states, improving UI consistency and accelerating developer velocity.
- Implemented comprehensive testing strategies, including automated unit, integration, and end-to-end (E2E) tests, preventing regressions in a high-stakes production environment.
- Conducted manual and automated testing across Web, Android, and iOS platforms, ensuring high-quality delivery and consistent user experience across the ecosystem.
- Authored and maintained technical documentation to streamline developer onboarding and enhance project scalability for future growth.

Software Engineer

LexisNexis | Remote

May 2021 to October 2022

- Built robust Node.js applications using Express, MySQL, and Sequelize, securing routes with Passport.js and JWT to enhance application security and reliability.
- Engineered complex data visualization tools, including interactive charts and maps, optimizing performance by reducing unnecessary re-renders for faster user interactions.
- Implemented digital credentialing using Microsoft Verifiable Credentials and custom authentication libraries, strengthening security and identity management.

- Refactored legacy code and utilized worker threads for heavy backend calculations, improving system efficiency and reducing response times for critical operations.

Front-end Web Developer
CSI WORKS
September 2019 to May 2021

- Translated complex wireframes into functional, cross-platform code using Styled Components and React, enhancing UI/UX consistency across devices.
- Developed complex controlled forms with Formik, implementing rigorous input validation and sophisticated error handling to improve data integrity.
- Managed application flow using React Router with protected and nested routing, optimizing performance through strategic component memoization.

Education

Full Stack Web Development (Certificate of completion)
University of California San Diego Extension Coding | San Diego, CA
November 2019

Hospitality (Bachelor's Degree)
Kyiv University of Tourism
August 2011

Skills
